November 2024

The work took me some place very special to me in the month of November - back to the Northeast Louisiana Association.

I drove to West Monroe on Friday and met up with some members of Hyde Park Baptist for dinner and fellowship that evening. Adam McKithern donated some tools to the ABATech ministry and Pete Wollerson opened his home. We had a wonderful time of fellowship but it was also very bittersweet for me as that was my first time stepping into the Wollerson home since Bro. Pete's wife, Sis. Carla, went to be with the Lord. Still, we smiled and laughed as we reminisced. I hope that I was able to be as much of a blessing to him as he was to me. But that was just the bonus of the trip. The real reason for my returning to Louisiana was to install two TVs at Central MBC of Bastrop. Another Hyde Park member and song leader, Bro. Coty Lee, joined me on the project, and I could not have done it without him. Bro. Coty has been a huge blessing to me and my family since the day we first met, and continues to be. We are grateful for him.

The project on Saturday went well, and the report from Sunday was that everyone loved the new screens! I have attached a photo to show the stark difference in color between the old projector we replaced and the new TV screens. Thank you to Central MBC for the \$500 love offering and thank you to Coty Lee for the help.

The project was not entirely without issue. I started having some pains in my upper-abdomen during the project and after getting back home to Nacogdoches, I ended up in the ER. The official diagnoses was a

hernia and a bad gallbladder! I am now following a special diet (as best I can with Thanksgiving and Christmas) and feeling better. Some people even say I'm looking a little slimmer!

The morning that I traveled to Louisiana for the project, I first had to travel two hours the other direction to Houston for a work meeting. My 2017 Chevy Silverado was acting up all the way there, so when I got back home, I had to have the transmission rebuilt. \$4,500 later, it still wasn't

acting right so I bit the bullet and bought a 2021 model. It is a lesser package than the one I had, but it drives great and only has 75k miles. The same day, I also traded Amanda's 2016 Buick Enclave in on a 2019 GMC Acadia with only 39k miles. We're both happy with the new vehicles and pray they will last us a very long time. Thanks to Kyle Noland and Rex Perry Autoplex in Nacogdoches for helping us on the deal.

Please join us in praying for the Lord's will in our lives. A ministry opportunity is before us but would require moving a great distance. We moved back here to be near mom after dad passed in 2022, and Caleb has established a business here in that time, so moving again now would mean leaving mom again and starting over for Caleb. While we wrestle with these internal conflicts, we are truly trying to discern the Lord's will, knowing that if it is His will for us to go, He will take care of all these things. Please help us pray for clarity concerning His will and direction.

God bless you all. Thank you for reading, and if there is any way that I can be a blessing to you as you are to me, please let me know by calling or texting 318.692.0523 or emailing branleejo@outlook.com.
